High Fidelity UI design

In this task, we convert a low-fidelity wireframe into a **complete, visually detailed UI design**.

This means:

- Add colors, images, icons, and styling

What I designed

I created a **Food Delivery Mobile App UI Design** with a clean and modern look.

The design focuses on:

- User-friendly interface
- Attractive visuals
- Easy navigation

Screens Included

- Splash Screen
- Login Screen
- Sign Up Screen
- OTP Verification Screen
- Home Screen
- Product Details Screen
- Cart Screen
- Checkout Screen
- Order Success Screen

These screens represent a complete user journey.

Key Design Elements

1. Color

- Used a consistent **orange theme**
- Makes the app visually appealing and branded

2. Typography

- Clean and readable text
- Proper font sizes and hierarchy

3. Layout

- Well-aligned components
- Balanced spacing and structure

4. Usability

- Easy-to-use buttons
- Smooth navigation between screens

User Flow

User opens the app → logs in → browses food → adds items to cart → proceeds to checkout → order is successfully placed.

Tools Used

- Figma
